

# Results Report — First Quarter 2026

Nimbus Data Systems S.A. — Confidential — Prepared by the office of the CFO, April 22, 2026

## 1. Executive summary

The first quarter of 2026 was the best quarter in the company's history. Revenue reached USD 6.7 million, year-over-year growth of 59.5% compared to USD 4.2 million in Q1 2025. Annual recurring revenue (ARR) closed at USD 26.8 million. In February 2026, the company closed its USD 40 million Series B round led by Meridian Growth Partners, with participation from existing investors Altavista Capital and Sur Ventures.

Product milestones for the quarter include the launch of NimbusVault 3.2 in February, featuring the new hybrid search engine, and the opening of the connector marketplace, which closed the quarter with 41 available integrations.

## 2. Commercial metrics

| Metric                      | Q1 2026 | Q4 2025 | Change  |
|-----------------------------|---------|---------|---------|
| Revenue (USD M)             | 6.7     | 5.9     | +13.6%  |
| ARR (USD M)                 | 26.8    | 23.6    | +13.6%  |
| Active customers            | 627     | 583     | +44     |
| New enterprise customers    | 23      | 17      | +6      |
| Net revenue retention (NRR) | 118%    | 114%    | +4 pp   |
| Monthly customer churn      | 1.8%    | 2.1%    | -0.3 pp |
| NPS                         | 56      | 51      | +5      |

Customer acquisition cost (CAC) for the quarter was USD 11,400, with an LTV/CAC ratio of 4.6. The average annual contract value per enterprise customer rose to USD 78,000.

### 2.1 Geographic distribution

North America remains the largest market with 312 active customers, followed by Latin America with 178. Europe reached 96 customers after the commercial launch in the United Kingdom and Germany, and Asia-Pacific closed at 41.

Active customers by region — Q1 2026 (total: 627)

### 3. Financial results

| Item                                | Q1 2026 (USD M) |
|-------------------------------------|-----------------|
| Revenue                             | 6.70            |
| Cost of revenue                     | 1.74            |
| Gross margin                        | 74.0%           |
| R&D expenses                        | 2.31            |
| Sales and marketing expenses        | 2.05            |
| General and administrative expenses | 1.12            |
| Operating result                    | -0.52           |
| Cash and equivalents at close       | 19.30           |

Net cash burn for the quarter was USD 0.69 million, which, together with the Series B funds, provides an estimated runway of 28 months at the planned investment pace. The plan targets reaching operating break-even in Q3 2027.

### 4. People

Headcount closed the quarter at 142 people, with 19 net additions. Annualized voluntary attrition was 8.4%, below the industry average. For Q2 2026, 24 active openings are planned, concentrated in Engineering (14) and Sales (7).

## 5. Next quarter objectives

The priority objectives for Q2 2026 approved by the board are:

| Objective                                 | Success metric                      |
|-------------------------------------------|-------------------------------------|
| Launch NimbusVault 3.3 with answer agents | General availability before June 30 |
| Expand the US sales team                  | 6 account executives hired          |
| Reach USD 30 M in ARR                     | ARR $\geq$ 30 M by 06/30/2026       |
| ISO 27001 certification                   | Stage 1 audit completed             |
| Connector marketplace                     | 60 integrations published           |

## 6. Identified risks

The risk committee highlighted three fronts: (i) revenue concentration, since the top 10 customers represent 31% of ARR; (ii) competitive pressure from cloud providers adding native semantic search; and (iii) dependence on a single embeddings model provider, to be mitigated during 2026 by rolling out the in-house nimbus-embed-2 model to all plans.
